Title: Upload Documents for Job Applications (US01)	**Priority:** Medium	**Estimate:** 5

User story

As a student/candidate,

I want to be able to upload my resume and cover letter,

so that I can submit them along with my job applications.

Constraints

- **Support Clarity:** The system should provide clear instructions on how to upload the resume and cover letter.

- **Support Validatability:** After successful upload, the system should display a confirmation message to validate the file upload.

Acceptance criteria

Given that I am on the job application page,

When I click on the "Upload Resume" button,

Then I should be able to select and upload my resume file. And the system should display a success message confirming the upload. If the file format is not supported, the system should display an error message indicating the acceptable file formats.

Title: View Candidate Documents (US02)	**Priority:** Medium	**Estimate:** 3

User story

As an employer,

I want to be able to view the documents uploaded by candidates,

so that I can assess their qualifications and suitability for the job.

Constraints

- **Support Clarity:** The system should clearly indicate where the uploaded documents can be accessed and downloaded.

- **Support Validatability:** The system should accurately display the uploaded documents to validate their availability.

Acceptance criteria

Given that I am reviewing a candidate's application,

When I access the candidate's profile,

Then I should be able to see and download their uploaded resume and cover letter. If no documents are uploaded, the system should display a message indicating that no documents are available.

Title: Employer Job Posting (US03)	**Priority:** High	**Estimate:** 2

User story

As an employer,

I want to post job openings on the career services platform,

so that I can attract potential candidates and fill vacant positions.

Constraints

- **Support Clarity:** The job posting form should clearly indicate the required fields and any formatting or character limits.

- **Support Validatability:** After successful job posting, the system should display a confirmation message to validate that the job posting is published.

Acceptance criteria

Given that I am logged in as an employer,

When I navigate to the job posting section,

Then I should be able to provide details about the job (title, description, requirements, location, etc.). After submitting the job posting, it should be visible to job-seeking candidates on the platform.

Title: Customer Sign-up and Login (US04)	**Priority:** Moderate	**Estimate:** 3

User story

As a customer (job-seeking candidate),

I want to create an account and log in to the career services platform,

so that I can access the features and benefits offered.

Constraints

- **Support Clarity:** The sign-up process should clearly indicate the required information and password strength requirements.

- **Support Validatability:** After successful sign-up, the system should display a confirmation message or email to validate the account creation.

Acceptance criteria

Given that I am on the platform's homepage,

When I click on the "Sign Up" button,

Then I should be able to fill in my details (name, email, password) and create an account. Once signed up, I should be able to log in using my credentials (email and password).

Title: Admin User Profile and Platform Management (US05)	**Priority:** High	**Estimate:** 5

User story

As an admin,

I want to manage user profiles, job postings, and monitor platform activity,

so that I can ensure the system's integrity, security, and provide support when needed.

Constraints

- **Support Clarity:** The admin dashboard should have clear navigation and user interface to perform various management tasks.

- **Support Validatability:** The system should provide feedback and confirmation when performing admin actions, such as profile updates, job post moderation, and user account management.

Acceptance criteria

Given that I am logged in as an admin,

When I access the admin dashboard,

Then I should be able to perform the following tasks:
- Manage User Profiles
- Manage Job Postings
- Track and Monitor Platform Activity
- Provide Support and Assistance
